The MW1-LTX-Fx wireless belt-pack transmitters are part of the Bosch wireless microphone system. The complete system consists of:

- a microphone receiver (MW1-RX-Fx), comes with AC/DC power supply and 1.5 m 3-pin male/female XLR cable
- a wireless belt-pack transmitter with clip-on Lavalier microphone (MW1-LTX-Fx), comes with clip, protective case, 2 LR5/AA batteries and windscreen
- or a wireless handheld microphone (MW1-HTX-Fx), comes with microphone holder, protective case, 2 LR5/AA batteries and 7 color caps

The products are sold separately to offer optimal flexibility in the composition of a system.

The wireless microphone system is designed for public address in houses of worship, restaurants, conference centers, hotels, shops and many other applications. The Lavalier microphone (MW1-LMC) can be ordered separately without the belt-pack transmitter. An optional head-worn microphone (MW1-HMC), connected to the belt-pack transmitter, can also be ordered separately.

Functions

Frequencies

This microphone system operates in the UHF band providing interference reduction, while selectable channels, available within the frequencies, ensure stable reception.

The following frequencies with selectable channels are available:

F4: 606-630 MHz. F5: 722-746 MHz. F6: 925-937 MHz

Note: F4 and F5 are only allowed in all European and EFTA countries.

Operation

The belt-pack transmitter can operate approximately 15 hours on alkaline batteries. A lock function protects the transmitter settings, making accidental changes impossible. This feature is also available on the Bosch microphone receiver and the belt-pack transmitter. An LCD on the transmitter shows the selected frequency and the battery status.

The belt-pack transmitter comes with a case to protect it from damage, and a Lavalier clip-on microphone (MW1-LMC).

Controls and indicators

- · Power on/off
- Frequency up/down buttons
- · LCD displaying frequency and battery level
